Terms of Use

MINIZORA / iOS & Android
Effective date: October 26, 2026

These Terms of Use govern your use of MiniZora, a file compression and conversion app for images, videos, audio, and documents. In these terms, "MiniZora" refers to the app and "developer" refers to the provider identified on its official app store listing.

1. Acceptance and eligibility

By using MiniZora, you agree to these terms. If you do not agree, stop using the app. You must have the legal capacity to accept these terms under the rules that apply to you. If you are a minor, use the app with permission and supervision from a parent or legal guardian where required.

2. Permission to use the app

Subject to these terms and applicable app store rules, the developer grants you a limited, non-exclusive, non-transferable license to use MiniZora on devices you are authorized to use. This license does not transfer ownership of the app, its branding, or its software. Third-party and open-source components remain subject to their respective licenses.

3. Your files and responsibilities

You retain your rights in the files you select and the results generated from them. Selecting or processing a file does not transfer ownership to the developer. You must own the file or have permission to access, modify, compress, convert, save, and share it. You are responsible for respecting copyright, privacy, confidentiality, and other rights of the people or organizations involved.

Keep an independent backup of important originals. Check the quality, content, completeness, and compatibility of every result before relying on it, distributing it, or deleting an original. Compression is not a backup service or a guarantee that a file is suitable for a particular purpose.

4. Processing and output limitations

Compression and conversion run on your device. Supported formats, settings, and size limits may vary by app version, platform, and device. Processing may fail or be interrupted by insufficient storage, memory limits, unsupported files, device conditions, or operating system restrictions. File size reduction and processing time are not guaranteed.

Depending on the format and selected settings, processing can change visual or audio quality, resolution, formatting, metadata, or compatibility. Do not assume that compression removes sensitive metadata or preserves digital signatures, accessibility features, or every feature of a source file.

5. Acceptable use

Do not use MiniZora for unlawful activity, to infringe another person's rights, or to process or distribute content without authorization. Do not introduce malicious files, interfere with the app's security or operation, or misrepresent the origin of the app. Restrictions on copying, modifying, or reverse engineering apply only to the extent permitted by law and relevant software licenses.

Storage, privacy & other terms

6. Saving and temporary storage

Working copies and generated files may be held in temporary app storage. Temporary results may be removed when a session is reset, resources are released, or the operating system clears cache. Export results you want to keep. A preview or completed processing step does not by itself confirm that a file was saved to your chosen destination.

You control the save destination and are responsible for checking save confirmations and any replacement or overwrite prompts. Exported files remain subject to the destination's storage, synchronization, retention, and deletion behavior. Interruptions can leave temporary copies until later cleanup; secure erasure is not guaranteed.

7. Privacy and third-party services

Read the accompanying MiniZora Privacy & Data Policy for information about selected files, local preferences, temporary storage, and Firebase Crashlytics diagnostics. On-device compression does not mean the app never communicates over the internet: technical crash diagnostics may be transmitted as described in that policy.

System file pickers, cloud storage destinations, app stores, and other external services operate under their own terms and privacy practices. You are responsible for reviewing the terms of services you choose to use with MiniZora. These Terms of Use do not grant consent for data processing where separate consent is required.

8. Availability, updates, and ending use

Features, compatibility, and availability may change through updates or discontinuation. The developer does not promise uninterrupted access or support for every device or file format. You may stop using and uninstall the app at any time. Uninstalling does not necessarily remove exported files, cloud copies, backups, or previously submitted crash reports.

9. Warranties and responsibility

To the extent permitted by applicable law, MiniZora is provided "as is" and "as available," without additional promises that it will be error-free, meet every requirement, or preserve every aspect of a file. To the extent permitted by law, the developer is not responsible for indirect or consequential losses arising from use of the app, including loss of profits or business opportunities.

Nothing in these terms excludes or limits non-waivable consumer rights, remedies, statutory warranties, or liability that cannot lawfully be excluded or limited. These terms do not require you to give up access to a court or other mandatory legal protections.

10. Changes, interpretation, and contact

The developer may revise these terms to reflect app changes or operating requirements. Updated terms will identify a new effective date and be made available with the app or its official materials. Where required, material changes will be communicated and acceptance requested before they apply. If you do not accept revised terms, stop using the app.

If a provision is unenforceable, the remaining provisions continue to apply to the extent permitted by law. For questions or support, use the developer contact or support channel on MiniZora's official app store listing. Do not send sensitive files unless necessary for your support request.
